Investment strategy

The Trust generally gains its investment exposure by investing in a well diversified portfolio of Australian share investment managers⁴.

The Trust's investments generally provide exposure to stocks within the S&P/ASX 300 Accumulation Index.

The Trust aims to be fully invested at all times with cash exposure not exceeding 10% for any length of time.

The Trust is authorised to utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 5 to 7 years
- with a high level of risk tolerance
- who are seeking capital growth through a well-diversified portfolio of Australian shares
- who are prepared to accept the higher levels of volatility typically associated with Australian share investments.

Quarter highlights

- The portfolio was rebalanced with trimming in the small cap allocation.
- AB outperformed due to positive stock selection in Materials, Industrials and Communication Services.
- Overweight to niche segments hurt the portfolio as they underperformed the broader market.
- Selector lagged due to challenging stock selection in Materials, Financials and Industrials.
- OC small caps underperformed due to overweights to Industrials and Communication Services and challenging stock selection in the Industrials sector.
- DNR trailed due to challenging stock selection in the Real Estate, Financials, and Materials sectors.
- Martin Currie lagged due to challenging stock selection in Real Estate, Financials and Communication Services.

Notes to the trust profile

- Effective from 1 July 2017, this Trust has elected into the Attribution Managed Investment Trust (AMIT) regime, which may allow income to be 'attributed' to unitholders without actually paying a cash distribution for that income. Please refer to the latest IOOF MultiMix Trusts Product Disclosure Statement (PDS) for further information about the AMIT regime.
- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total estimated management cost includes the management fee and any applicable performance-related fees that may be charged by underlying investment managers. These costs are subject to change from time to time and may vary depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The estimated performance-related fees are indicative and have been based on the annualised performance-related fees incurred as at 30 June 2018. Please refer to the latest IOOF MultiMix Trusts PDS for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
- Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
