Investment strategy

The Trust generally gains its investment exposure by investing in a well diversified portfolio of Australian share investment managers.

The Trust's investments generally provide exposure to stocks within the S&P/ASX 300 Accumulation Index³.

The Trust aims to be fully invested at all times with cash exposure not exceeding 10% for any length of time.

The Trust is authorised to utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 5 to 7 years
- with a high level of risk tolerance
- who are seeking capital growth through a well-diversified portfolio of Australian shares
- who are prepared to accept the higher levels of volatility typically associated with Australian share investments.

Notes to the trust profile

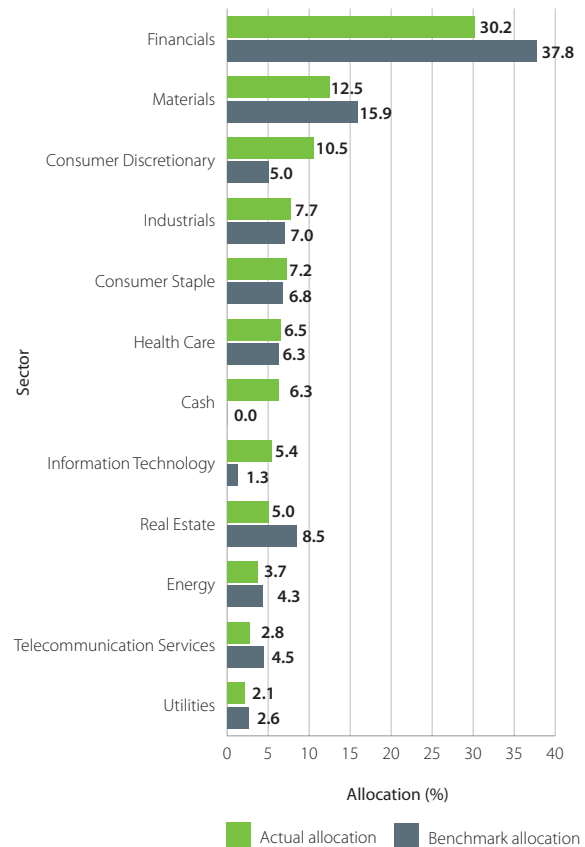

- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total management costs are subject to change from time to time and may vary slightly from the estimated management costs (as detailed in the current PDS) depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The total management cost listed includes any performance fees that may be charged by underlying investment managers. Please refer to the current PDS for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is calculated using \$A and is net of management costs and expenses as disclosed in the current PDS. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price.
- Past performance is not a reliable indicator of future performance.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
- Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.
