## Investment strategy

The Trust generally gains its investment exposure by investing in a portfolio of domestic cash investment managers.

The Trust is designed to provide investors with returns higher than a fund invested purely in cash, and in excess of the Bloomberg AusBond Bank Bill Index.

The Trust aims to be fully invested with exposure to cash and short-term securities at all times.

The underlying investments of the Trust may comprise of bank bills and other short-term money market securities, such as short-term loans to banks, corporates and Australian governments, which are considered to be secure investments.

## Quarter highlights as at 31/03/2025

- Global bond markets were extremely volatile over the March Quarter. Bond yields began the year pushing higher, fuelled by optimism over Trump's pro-growth policies. The US 10 year Treasury hit a high of 4.79% on the 14th January before rallying 58 basis points to close the month at 4.21%. This fall in rates was driven by trade policy uncertainty around tariffs which led the market to focus on the negative implications for growth and an increased probability of recession
- Duration and sector/security selection added value.
- No major detractors.

### Notes to the trust profile

- 1 The total estimated ongoing annual fees and costs includes the management fee, indirect costs, net transaction costs and any performance fees (shown if applicable). These costs are subject to change from time to time and may vary depending on changes to the composition of the underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. Please refer to the latest PDS and [www.ioof.com.au](http://www.ioof.com.au) for full details on fees and costs.
- 2 Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
