## Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The risk-averse nature of the Trust means it provides greater exposure to defensive income-bearing assets, such as cash, fixed interest and alternative - defensive. It may also hold a small exposure to growth assets such as Australian and international property and shares.

The Trust is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers may utilise strategies for the management of currency exposure. The level of currency hedging used for the Trust will vary from time to time. The Trust has the capacity to apply a currency overlay to manage the Trust's currency risk.

- Alternative Defensive portfolio underperformed its fixed interest benchmark due to the rise of the Australian dollar, as the portfolio is predominantly unhedged.
- Defensive equities portfolio underperformed in a strong market.
