Conservative Trust Profile

Investment objective

To provide stable returns over the medium term by investing in a diversified portfolio of defensive assets with some growth asset exposure, and to achieve a total return after fees in excess of the Trust's benchmark over a rolling three year period.

Quarter highlights

- Investments in new Australian equities portfolios, OC Micro Cap and Acorn Micro Cap, were made opportunistically over the quarter. Credit quality in fixed interest was improved to AA-. Alternative defensive cash holdings were increased as hedge fund exposure was reduced.
- The diversified fixed interest portfolio outperformed its benchmark due to Brandywine significantly outperforming its benchmark.
- The international equities portfolio outperformed its benchmark.
- An underweight allocation to cash also added value as cash underperformed other asset classes.
- A zero hedge on international equities detracted the bulk of value as unhedged international shares underperformed hedged.
- The alternative defensive portfolio underperformed its fixed interest benchmark.

Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The conservative nature of the Trust means it has a greater exposure to income bearing assets such as cash, fixed interest and alternative-defensive with some exposure to growth assets such as Australian and international property and shares⁴.

The Trust is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers may utilise strategies for the management of currency exposure. The level of currency hedging used for the Trust will vary from time to time. The Trust has the capacity to apply a currency overlay to manage the Trust's currency risk.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 3 to 5 years
- with a low to medium level of risk tolerance
- who are seeking a diversified portfolio of predominantly income-producing assets with some growth asset exposure.

Notes to the trust profile

- The composite benchmark incorporates the applicable indices (or benchmark) for each asset class weighted against the Trust's target (or neutral) allocation.
- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total management costs are subject to change from time to time and may vary slightly from the estimated management costs (as detailed in the current PDS) depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The total management cost listed includes any performance fees that may be charged by underlying investment managers. Please refer to the current PDS for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is calculated using SA and is net of management costs and expenses as disclosed in the current PDS. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price.
- Past performance is not a reliable indicator of future performance.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
- Property asset sector may include exposure to Australian direct property and Australian and international property securities.
- Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.
