### Investment strategy

The Trust generally gains its investment exposure by investing in a well-diversified portfolio of Australian and international fixed interest managers. The underlying fixed interest investments include a range of international and domestic government bonds, corporate debt and asset backed securities<sup>5</sup>.

The Trust can also invest in cash, although the cash exposure cannot exceed 25% for any length of time.

The Trust is authorised to utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

The underlying investment managers may utilise strategies for managing currency exposure. The Trust's overall international fixed interest exposure is generally hedged. The Trust has the capacity to apply a currency overlay to manage the Trust's currency risk.

### Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 2 to 3 years
- with a low to medium level of risk tolerance
- who are predominantly seeking income-generated returns through a well-diversified fixed interest portfolio.

### Performance<sup>6</sup>

	3 mths %	6 mths %	1 year %	3 years % pa	5 years % pa
Distribution	0.92	3.38	4.59	6.00	5.99
Growth	-0.26	-1.20	-1.70	-1.73	-1.17
<b>TOTAL</b>	0.65	2.18	2.89	4.27	4.82

Added value	0.24	0.68	3.00	-0.06	0.32

### Quarter highlights

- The portfolio reduced its exposure to emerging markets given the strong YTD performance in the sector - close to 7% in hard currency and 12% local currency - and moderately increased the exposure to the defensive asset sector in investment grade credit. BlueBay, PIMCO Australian Bond Fund and PIMCO Global Credit were terminated and Western Asset Australian Bond Fund and T. Rowe Price were appointed.
- The main contributors to performance were sector and security selection both from investment grade credit and emerging markets as credit spreads continue to tighten.

### Notes to the trust profile

- The composite benchmark incorporates the applicable indices (or benchmark) for each asset class weighted against the Trust's target (or neutral) allocation
- Effective from 1 July 2017, this Trust has elected into the Attribution Managed Investment Trust (AMIT) regime, which may allow income to be 'attributed' to unitholders without actually paying a cash distribution for that income. Please refer to the latest IOOF MultiMix Trusts Product Disclosure Statement (PDS) for further information about the AMIT regime.
- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total estimated management cost includes the management fee and any applicable performance-related fees that may be charged by underlying investment managers. These costs are subject to change from time to time and may vary depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The estimated performance-related fees are indicative and have been based on the annualised performance-related fees incurred as at 30 June 2017. Please refer to the IOOF MultiMix Trusts PDS dated 30 September 2017 for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
