- An underweight to Australian shares detracted value.
- The Alternatives Growth portfolio underperformed its equities benchmark.
- An overweight to cash detracted value.

Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers⁵.

Due to the Trust's high growth nature, it predominantly gains exposure to growth assets such as Australian and international property and shares and alternative – growth. It may also have a small exposure to defensive assets such as cash, fixed interest and alternative – defensive.

The Trust is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers may utilise strategies for the management of currency exposure.

The level of currency hedging used for the Trust will vary from time to time. The Trust has the capacity to change the level and nature of the currency overlay to manage the Trust's currency risk.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 5 to 7 years
- with a high level of risk tolerance
- who are seeking capital growth through a well-diversified portfolio of growth assets
- who can accept the volatility associated with a portfolio with significant growth asset exposure.

Notes to the trust profile

- 1 The composite benchmark incorporates the applicable indices (or benchmark) for each asset class weighted against the Trust's target (or neutral) allocation.
- 2 Effective from 1 July 2017, this Trust has elected into the Attribution Managed Investment Trust (AMIT) regime, which may allow income to be 'attributed' to unitholders without actually paying a cash distribution for that income. Please refer to the latest IOOF MultiMix Trusts Product Disclosure Statement (PDS) for further information about the AMIT regime.
- 3 Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- 4 The total estimated management cost includes the management fee and any applicable performance-related fees that may be charged by underlying investment managers. These costs are subject to change from time to time and may vary depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The estimated performance-related fees are indicative and have been based on the annualised performance-related fees incurred as at 30 June 2017. Please refer to the IOOF MultiMix Trusts PDS dated 30 September 2017 for full details on fees and costs.
- 5 For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- 6 Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
- 7 The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
- 8 Property asset sector may include exposure to Australian direct property and Australian and international property securities.
- 9 Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.
