Investment strategy

The Trust generally gains its investment exposure by investing in a well-diversified portfolio of international share investment managers.

The Trust's investments generally provide exposure to stocks within the MSCI All Country World ex Australia Index (\$A). However, the Trust has the capacity to gain exposure to shares outside the index, such as emerging markets and unlisted shares.

The Trust aims to be fully invested at all times with cash exposure not exceeding 10% for any length of time.

The Trust is authorised to utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the Trust that part of the international currency exposure may be hedged. The Trust has the capacity to apply currency overlay to manage currency risk.

Notes to the trust profile

- 1 The total estimated ongoing annual fees and costs includes the management fee, indirect costs, net transaction costs and any performance fees (shown if applicable). These costs are subject to change from time to time and may vary depending on changes to the composition of the underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. Please refer to the latest PDS and www.ioof.com.au for full details on fees and costs.
- 2 Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
