Investment strategy

The Trust generally gains its investment exposure by investing in a well-diversified portfolio of international share investment managers⁵.

The Trust's investments generally provide exposure to stocks within the MSCI All Country World Ex-Australia Index (\$A). However, the Trust has the capacity to gain exposure to shares outside the index, such as emerging markets and unlisted shares.

The Trust aims to be fully invested at all times with cash exposure not exceeding 10% for any length of time.

The Trust is authorised to utilise approved derivative instruments subject to the specific restriction that derivative instruments cannot be used to gear the portfolio exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the Trust that part of the international currency exposure may be hedged. The Trust has the capacity to apply currency overlay to manage currency risk.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of 5 to 7 years
- with a high level of risk tolerance
- who are seeking capital growth through a well-diversified portfolio of international shares
- who are prepared to accept the higher levels of volatility typically associated with international share investments.

Quarter highlights

- An overweight to emerging markets added value as emerging markets outperformed developed markets by over 6%.
- SSgA Defensive Equities, Antipodes Global and TT International Emerging Markets strategy outperformed their respective benchmarks.
- Despite Value outperforming over the quarter, value manager LSV underperformed both the value benchmark and the core benchmark.
- Growth manager Wellington also underperformed its benchmark.
- EAM Emerging markets small caps and new manager THB international micro caps both underperformed.

Notes to the trust profile

- Note, the MSCI World Ex-Australia Index (\$A) Hedged may be used from time to time, depending on the strategic hedging ratio applied to the international shares portfolio.
- Effective from 1 July 2017, this Trust has elected into the Attribution Managed Investment Trust (AMIT) regime, which may allow income to be 'attributed' to unitholders without actually paying a cash distribution for that income. Please refer to the latest IOOF MultiMix Trusts Product Disclosure Statement (PDS) for further information about the AMIT regime.
- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total estimated management cost includes the management fee and any applicable performance-related fees that may be charged by underlying investment managers. These costs are subject to change from time to time and may vary depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The estimated performance-related fees are indicative and have been based on the annualised performance-related fees incurred as at 30 June 2018. Please refer to the latest IOOF MultiMix Trusts PDS for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
- Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
