Estimated performance fee	Nil
Total estimated management cost	0.50% pa

## Investment strategy

The Trust gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The balanced orientation of the Trust provides a greater exposure to growth assets, such as property, Australian and international shares, and alternative assets, with a moderate exposure to defensive assets, such as fixed interest and cash.

A mix of passive, factor and active investment managers may be selected to manage the assets of the Trust providing differing yet complementary investment styles to achieve more consistent investment returns.

The Trust is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that the derivative instruments are not used to gear the Trust's exposure.

We recognise that currency can be a major component of risk for overseas investments. As such, we invest in some underlying managers that are fully hedged against currency fluctuations. As part of our approach, the Trust has the capacity to manage currency risk by adjusting its allocation to those underlying managers that are fully hedged.

## Quarter highlights

- Metrics Credit Partners Credit Trust was added to Alternatives in August 2020.
- Diversified fixed interest portfolio outperformed, with all underlying managers outperforming their benchmarks. Western, Ardea and Brandywine performed particularly well.
- Alternatives portfolio also outperformed, with solid performance from private debt manager, Metrics.
- International equities portfolio slightly underperformed its benchmark as a result of underperformance from TT International.
