Investment strategy

The IOOF WealthBuilder Fixed Interest Fund ('Fund') invests in a range of interest bearing securities which includes Government bonds, corporate debt and asset-backed securities.

Exposure to each sector will be actively managed based upon Perennial's assessment of the relative value between the respective sectors and interest rate outlook.

The Fund is authorised to utilise approved derivative instruments, subject to the specific restriction that derivative instruments cannot be used to gear portfolio exposure. When used for investment purposes, no more than 30% of the Fund can be exposed to derivative instruments as determined by their market equivalent exposure.
