Investment strategy

The IOOF WealthBuilder Global Shares High Alpha Fund (Fund) gains its investment exposure by investing in a diversified portfolio of global shares with an aim of delivering an absolute return to investors.

The portfolio invests in a range of global companies which the investment manager believes offer quality earnings potential and long term growth prospects at attractive prices.

The portfolio holds a select number of companies listed on overseas sharemarkets. The investment manager's strategy to mitigate downside risk to investors includes investing up to 50% of the portfolio into cash to preserve capital.

The cash level of the portfolio (maximum holding of 50%) will reflect the investment manager's confidence that markets could continue to provide positive returns. The investment managers is not attempting to be a 'market timer' but rather be cognisant of the orces that could result in a broad sell off, such as rising interest rates, resurgent inflationary pressures or economic malaise.

The Fund does not hedge against foreign exchange movements, however the underlying IOOF Group unit trusts in which the Fund invests or the underlying investment managers may do so.
