Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers⁵.

The moderate growth orientation of the Trust means it has similar exposure to growth assets (such as Australian and international property and shares and alternative – growth) and defensive assets (such as cash, fixed interest and alternative – defensive).

The Trust is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers may utilise strategies for the management of currency exposure.

The level of currency hedging used for the Trust will vary from time to time. The Trust has the capacity to change the level and nature of the currency overlay to manage the Trust's currency risk.

Investor profile

The Trust may be suitable for investors:

- with an investment horizon of approximately 5 years
- with a medium level of risk tolerance
- who are seeking both income and capital growth through a well-diversified portfolio.

Quarter highlights

- New manager Alphinity Global was appointed to the international equities portfolio replacing State Street Global Advisors. Quest Asset Partners was appointed to the Australian equities portfolio replacing Janus Henderson.
- Overweight to the defensive equities portfolio contributed to performance.
- Underweight to cash and fixed interest contributed as these had low returns versus other asset classes.
- Underweight to core Australian equities detracted value.
- Overweight to the Income Trust also detracted.
- Alternatives Growth portfolio underperformed its unhedged equity benchmark.
- Alternatives Defensive portfolio underperformed its fixed interest benchmark.

Asset, strategy and manager weightings⁷

Alternative – defensive	Asset allocation range 0-15%	Target asset allocation 5%	Total actual asset allocation 7.39%
Alternative – growth	Asset allocation range 0-15%	Target asset allocation 5%	Total actual asset allocation 5.13%

In line with other asset classes, IOOF uses a multi-manager approach to manage alternative growth and defensive assets in the MultiMix diversified trusts. The number of investment managers and/or investments in these asset classes will be fairly large and change over time. IOOF managed a total of \$497.25 million alternative growth and defensive assets as at 31 March 2019.

Actual versus target asset allocation

The asset allocations provided in the above graph may not total 100% due to the effects of rounding.

Notes to the trust profile

- The composite benchmark incorporates the applicable indices (or benchmark) for each asset class weighted against the Trust's target (or neutral) allocation.
- Effective from 1 July 2017, this Trust has elected into the Attribution Managed Investment Trust (AMIT) regime, which may allow income to be 'attributed' to unitholders without actually paying a cash distribution for that income. Please refer to the latest IOOF MultiMix Trusts Product Disclosure Statement (PDS) for further information about the AMIT regime.
- Investment and withdrawal minimums do not apply for investments in the Trust via a master trust or investor directed portfolio service (IDPS). Please refer to the current IOOF MultiMix Trusts PDS, IDPS offer document or master trust PDS for more information.
- The total estimated management cost includes the management fee and any applicable performance-related fees that may be charged by underlying investment managers. These costs are subject to change from time to time and may vary depending on changes to the composition of the Trust's underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. The estimated performance-related fees are indicative and have been based on the annualised performance-related fees incurred as at 30 June 2018. Please refer to the latest IOOF MultiMix Trusts PDS for full details on fees and costs.
- For reasons of investment efficiency, the Trust may gain its exposure by holding units in other IOOF group unit trusts and/or through direct investment holdings.
- Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
- The asset allocations and investment manager allocations reflect the combined indirect exposure of the Trust's holdings via other IOOF group unit trusts and/or direct investments. Actual asset allocations may move outside the target asset allocations and ranges (as specified in the current PDS) from time to time.
- Property asset sector may include exposure to Australian direct property and Australian and international property securities.
- Provides indirect composite stock holding of the Trust's exposure via underlying investment managers.

Important Note: This fund profile is issued by IOOF Investment Management Limited (IIML) ABN 53 006 695 021, AFS Licence No. 230524, as Responsible Entity for the IOOF MultiMix Trusts. IIML is a company within the IOOF group which consists of IOOF Holdings Ltd ABN 49 100 103 722 and its related bodies corporate. The offer of units in the IOOF MultiMix Trusts is made in the current PDS. This fund profile is not intended to represent investment or professional advice. The information does not take into account your individual objectives, financial circumstances or needs. You should assess whether the information is appropriate for you, having regard to your objectives, financial circumstances or needs. You should consider the PDS in deciding whether to acquire or to continue to hold the investment and consider talking to a licenced or appropriately authorised financial adviser before making an investment decision. The information in this fund profile is effective 31 March 2019.
