Investment strategy

The Trust predominantly invests in high quality short-term money market and bank-based securities to achieve a very stable income stream and attempts to forecast the short-term direction of the interest rate cycle.

Quarter highlights

- Over the quarter, money market yields continued to rise as central banks aggressively increased interest rates to deal with higher than expected inflation.
- Allocations to term deposits, NCDs and cash notice accounts have added value to the CMT.
- A longer weighted average maturity versus the benchmark subtracted value.
