## Investment strategy

The Trust gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The balanced orientation of the Trust provides a greater exposure to growth assets, such as property, Australian and international shares, and alternative assets, with a moderate exposure to defensive assets, such as fixed interest and cash.

A mix of passive, factor and active investment managers may be selected to manage the assets of the Trust providing differing yet complementary investment styles to achieve more consistent investment returns.

The Trust is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that the derivative instruments are not used to gear the Trust's exposure.

We recognise that currency can be a major component of risk for overseas investments. As such, we invest in some underlying managers that are fully hedged against currency fluctuations. As part of our approach, the Trust has the capacity to manage currency risk by adjusting its allocation to those underlying managers that are fully hedged.

## Quarter highlights

- There were no manager changes over the quarter.
- Both the Australian and international equities portfolios outperformed their respective benchmarks.
- An overweight to Alternatives contributed to performance, together with the underlying managers performing well - particularly private debt manager Metrics.
- The direct property portfolio produced a solid return for the quarter, due to some positive revaluations.
- Although emerging markets outperformed developed markets, the emerging markets managers underperformed the benchmark.
- An underweight allocation to fixed interest detracted value.

## Manager weightings

Asset class	Investment manager/s strategy	Manager style/strategy description	Asset allocation %
Australian shares	Acadian Asset Management (Australia) Limited	Small companies	1.75
