Investment objective²

To grow the value of your investment over the medium to long term by investing in a UMF providing a diversified portfolio exposure of growth and defensive assets.

The UMF aims to provide capital growth over the medium to long term by investing in a diversified portfolio of growth and defensive assets, and to achieve a total return after fees in excess of the UMF's benchmark⁴ over a rolling five-year period.

Investment strategy²

The Fund aims to be fully invested, providing a diversified investment exposure⁵.

The UMF generally gains its exposure through a mix of investment managers.

The moderate growth orientation of the UMF means it has similar exposure to growth assets (such as Australian and international property and shares and alternative – growth) and defensive assets (such as cash, fixed interest and alternative – defensive).

The UMF is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers of the UMF may utilise strategies for the management of currency exposure. The level of currency hedging used for the UMF will vary from time to time. The UMF has the capacity to change the level and nature of the currency overlay to manage the UMF's currency risk.
